PROGRAM CERTIFICATION

Microsoft Azure Fundamentals Certification

MICROSOFT EXCEL ONE - FOUNDATIONS

In this course you will learn how to create spreadsheets and workbooks that you can use to store, manipulate, and share your data.

MICROSOFT EXCEL TWO - ANALYZING AND PRESENTING DATA

In this course you will get hands on experience with guided labs on how to organize table data, present data as charts, and enhance the look and appeal of workbooks by adding graphical objects.

MICROSOFT EXCEL THREE - ADVANCED FUNCTIONS AND DATA FORECASTING

In this course you will be able to perform advanced data analysis, collaborate on workbooks with other users, and automate workbook functionality.

FUNDAMENTALS OF SQL

Many organizations use databases to store their most critical information: the information that manages their day-to-day operations. After the data is stored in databases, however, it is useless unless you can retrieve it for further business analysis.

ANALYZING DATA WITH MICROSOFT POWER BI

This course will discuss the various methods and best practices that are in line with business and technical requirements for modeling, visualizing, and analyzing data with Power BI. The course will also show how to access and process data from a range of data sources including both relational and non-relational data. This course will also explore how to implement proper security standards and policies across the Power BI spectrum including datasets and groups. The course will also discuss how to manage and deploy reports and dashboards for sharing and content distribution. Finally, this course will show how to build paginated reports within the Power BI service and publish them to a workspace for inclusion within Power BI.

MICROSOFT AZURE FUNDAMENTALS

This course will provide foundational level knowledge on cloud concepts; core Azure services; security, privacy, compliance, and trust; and Azure pricing and support. The content aligns to the AZ-900 exam objective domain.

STRENGTHS FINDERS WORKSHOP

Using the Gallup Strengths online assessment, each participant will complete the evaluation to identify their top 5 natural strengths. Once strengths are discovered, explained and validated by interactive exercises attendees will know how to leverage their natural strengths to contribute to the success of the organization's team.

EMOTIONAL INTELLIGENCE WORKSHOP

In this class the student will learn:

- The difference between IQ, EQ and personality.
- The tangible, hard, financial benefits of having high Emotional Intelligence (EQ).
- How brain function and chemistry impacts your EQ skills.
- Real world, practical, day to day, applications of Emotional Intelligence.
- Advanced emotional observation skills like MicroExpressions, Advanced Listening and the Japanese art of "Kuuki Yomenai" (Reading the Air). Practical tips, techniques, resources and tools for improving your own EQ.inclusion within Power BI.

POTENTIAL JOB TITLES YOU CAN QUALIFY FOR

- Data Analyst
- Data Administrator
- Business Analyst
