## EDUCATION

### MAX Technical Training | JAVA Coding & Career Bootcamp

Graduate '20

The intensive 11-week accelerated, full-stack, JAVA coding curriculum was the perfect path for me to return to the workforce. Consuming more than 440-hours of curriculum in coding, application development, and career training has prepared me to make an immediate impact on any development team.

The culmination of my training proved I can accomplish the following:

- Develop an Enterprise-level web-based application requiring the use of the full-stack technologies listed below.
- Utilize the JAVA language as my core focus with adaptations to C#.
- Successfully work in individual and team-based projects/labs.
- Prove my understand of technology from database to user interface.
- Present and clearly convey the project in technical and business acumen.
- Maintain an organized project with source control and an agile mindset.

The technology I gained experience in are:

- |              |                    |               |               |
|--------------|--------------------|---------------|---------------|
| • JAVA       | • Node.js          | • Springboot  | • Agile/Scrum |
| • C#         | • Typescript       | • Apache      | • JPA         |
| • MySQL      | • jQuery           | • Eclipse IDE | • Hibernate   |
| • HTML       | • Bootstrap        | • XML         | • JBDC        |
| • CSS        | • Spring Framework | • SQL         | • Junit       |
| • JavaScript | • Angular          | • Lambdas     | • VS Code     |

You are welcome to look at my work: [GitHub.com/Sarah-Marie](https://github.com/Sarah-Marie)

### Udemy Online | Javascript

Completed '21

- 40-hour Introduction into Javascript

### Northern Kentucky University | Bachelors of Arts in French

Graduate '19

- Graduated Magna Cum Laude with a focus in Education
- Phi Sigma Iota Gamma Phi, Member
- French Club Treasurer

## EXPERIENCE

### Momentum Developer Conference Website | Volunteer

- Software Engineer contributor on an Agile team project to update and extend momentumdevcon.com. Project used a Kanban board, hosted on Trello to manage tasks and GitHub to manage source code control.
- Designed feedback form in Visual Studio Code using JavaScript, HTML, Netlify, React, and CSS.
- Updated site viewed at <https://maxtrain-momentum-dev-con.netlify.app/>
